10	Pass	No damage or leakage. Slight scuffing on bottom of package.
11	Pass	No damage or leakage. Slight scuffing on bottom of package.

Note: Packages were vibrated in a group of three (3).

Pass/Fail Criteria

A packaging passes the vibration test if there is no rupture or leakage from any of the packages. No test sample should show any deterioration which could adversely affect transportation safety or any distortion liable to reduce packaging strength. After the test was completed, the test samples were opened and inspected for any damage; samples were placed horizontally during inspection to check for any leaks, spillage, or loss of contents (duration five minutes minimum).

Package was used from previous test. Yes or No:

Package #	No	Not applicable
Package #	No	Not applicable
Package #	No	Not applicable

Cobb Test

Test Method: ISO International Standard 535 as required by 49 CFR 178.516(b) (1)

The packages were conditioned in accordance with 49 CFR 178.602(d) to 50% +/- 2% relative humidity at 23 °C +/- 2 °C for at least 24 hours. Five (5) samples were tested from the boxes and subjected to a water absorption test in accordance with ISO International Standard 535.

Results

Sample Number	Water Absorption		Pass / Fail
1	150	g/m ²	Pass
2	147	g/m ²	Pass
3	148	g/m ²	Pass
4	151	g/m ²	Pass
5	152	g/m ²	Pass
Average	149.6	g/m ²	Pass

Pass/Fail Criteria

An increase in mass of greater than 155 g/m² over the 30 minute duration of the test represents an unacceptable level of water resistance.
