

ULINE H-7930 TERRACE BENCH WITH BACK

1-800-295-5510
uline.com

TOOLS NEEDED

Hammer

Drill

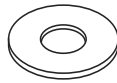

Masonry
Drill Bit

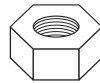

Adjustable
Wrench

PARTS

Washer x 4

Nut x 4

Wedge Anchor x 4

MOUNTING

1. Place bench where it is intended to be mounted.
2. Mark drill points on ground through bench feet.
3. Drill 3/8" holes into concrete with masonry bit.
(See Figure 1)

IMPORTANT! Minimum depth of 4" of concrete is necessary for surface mounting.

4. Clear holes of dust and debris.

5. Align holes in bench feet with drilled holes in concrete.
6. Place washer then nut on the edge of wedge anchor (protects threads during installation).
7. Hammer wedge anchor into hole deep enough so that threads are below surface of base material.
(See Figure 2)
8. Tighten hex nut on anchor mount. (See Figure 2)
