**UN/DOT Design Type Certification**

<b>Report No:</b>	S-1307-AL-240102	<b>Test Type:</b>	Periodic Retest
<b>Test Date:</b>	January 2, 2024	<b>Expiration Date:</b>	January 2, 2025
<b>Test Facility:</b>	Greif Packaging LLC 4300 West 130th St. Alsip, IL 60803	<b>Manufacturing Plant:</b>	Alsip Sd
		<b>Registered Symbol:</b>	GBC

Attached are our laboratory test result sheets of the UN/DOT Performance Test on the steel drums that were conducted at the above test facility location.

These sample containers, that were made with the proper components, passed the required tests for the following UN Marking(s):

1A1/X1.8/300 1A1/Y1.8/300 1A1/Z1.8/300

Thank you and best regards.

**Drum Type:** Steel Tight Head  
**UN Certified Marking(s):**

1A1/X1.8/300

1A1/Y1.8/300

1A1/Z1.8/300

**Diameter:** 22.5 inches  
**Overall Height:** 34.75 inches  
**Tare Weight:** 36.8 lbs  
**Gallon Capacity:** 40 - 55 gal  
**Steel (T/B/B):** 1.2 / .9 / 1.2  
**Hoops / Corrugations:** 2 Hoops  
**Necked-In Top:** No  
**Necked-In Bottom:** No  
**Tapered:** No  
**Bag/Tubing/Liner Mil:** None  
**Seal Top:** None  
**Composite Bottle:** None  
**Agitator:** No  
**End Seam Type:** Triple  
**Chime Bands:** No  
**Cover Gasket:** None

Additional components - see next page

**Drum Construction:**

Shell body is formed with longitudinally welded side seam, bottom end is mechanically seamed as indicated to lock bottom and shell together. Top end is mechanically seamed as indicated, or rolled outward to form a curl that allows for the attachment of a cover and locking ring. When top is removable, the cover has a sealing gasket inserted in the channel around the periphery of the cover. The cover is fixed with a locking band. Body or cover may contain fittings that are mechanically inserted as described in this report.

**Notes:**

1. Plug elastomer gaskets include EPDM, BUNA. All other gasket materials should be denoted in the tested design. For specific plug gasket and torque instructions, please refer to your product specific closure instruction on the packing slip.
2. See attached closure notification for torque values for applicable rings on test drum.
3. If torques for components are not included on the attached closure, the components were supplied by the customer for testing. Proper closure of the unit is the responsibility of the shipper.
4. Closures supplied by Greif for this design have been fully qualified throughout the packaging design history, and the closures on this report may not include all qualified closures for this design. Please consult Greif Quality Assurance and Regulatory Affairs for specific questions regarding closure qualification. In the event a closure that is not qualified by Greif is substituted by the customer, the certified mark should be voided and removed from the package. It is the responsibility of the customer to ensure that any substituted closures meet the requirement of CFR 49 178.601 and this report cannot be used as evidence of compliance to the certified marking.

\*\*\*\*\* CLOSURE NOTIFICATION \*\*\*\*\*

Pursuant to the requirements of the Department of Transportation in CFR 49 Part 178.2(c)(1), this is your notification of the closing method used for the the containers sold to you.

These instructions for closure are based upon the closure methods used to enable these containers to pass the United Nations test requirements as outlined by the UN marking on the package. This method of closure should be used to ensure that your containers have been closed in the same manner as when they were initially tested. To be UN certified, this drum must be closed with the same plugs used for certification. If the drum is purchased without these parts, contact the supplying Greif plant for the correct components.

Your product may adversely affect container materials, bung threads or closing devices. Product compatibility with the container is the shipper's responsibility.

The closure recommendations do not take into account any hazards present at your facility, or the handling, filling or shipping of your product.

Any container used for packaging hazardous materials should be inspected before filling and shipment. Containers with obvious damage or deterioration should not be filled or shipped.

NOTE: If drums are filled with products outside the marked rating, the warranty is null and void.

Plug Closing Instructions:

-----

- 1) Place the plugs into the appropriate bung.
- 2) Turn the plug gently clockwise, making sure that the plug is entering the bung properly.
- 3) Using a torque wrench, tighten the plug according to the manufacturer's recommended torque below.

Drums with plugs closed in this manner have met the UN performance requirement as specified in the container markings.
