

ULINE Mailer Guide

Use this guide to determine the right size mailer.

DETERMINING THE WIDTH OF YOUR MAILER

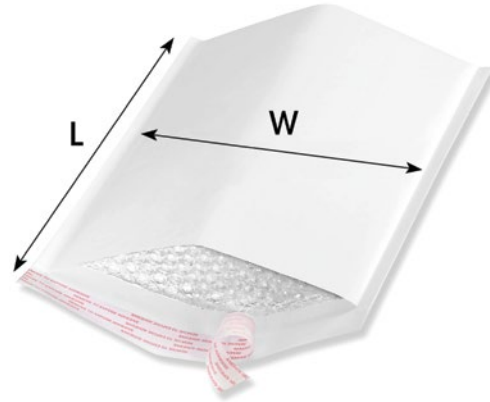

Width of product + thickness of product + 1/2"

DETERMINING THE INSIDE LENGTH OF YOUR MAILER

Length of product + thickness of product + 2"

HELPFUL HINTS

Thicker products require larger mailers.

MAILER PROPERTIES

These characteristics can be helpful when determining which mailer is right for you.

1. Uline Bubble Mailers

- Lightweight – Save on postage costs
- Seamless bottom construction and smooth side seams
- Self-seal
- Kraft or white

2. Uline Padded Mailers

- When extra padding is needed – Semi-rugged products
- Easy open tear strip. Padded with shredded paper.
- Self-seal
- Gold, kraft or white

3. Uline Poly Mailers

- Lightweight. Tear and water resistant.
- Often used to ship clothing and prescriptions
- 3 mil – Industry standard: 2.5 mil
- Self-seal
- Bright white with silver tint lining – No show through

4. Stayflats™

- For photos, posters, diplomas. Gusseted and side loading available.
- Stiff fiberboard prevents bending
- Self-seal or tab locking
- Kraft, white or black

5. Tyvek® Envelopes

- Tear-proof mailer. Tyvek material is ten times stronger than paper.
- Flat and expandable. First class available in select sizes.
- Self-seal
- White or select sizes available in yellow, green, red, black or silver
